To aid in understanding the method by which your project assignments are evaluated, read the following carefully. The actual grading criteria will be related to these categories but will be more specific in nature.

F: 59 and below: *The student work is unresolved; the intentions are unclear and major criteria or goals lack resolution. Presentation is incomplete and/or of poor quality. There is a complete lack of problem solving, creative content and/or technical merit.*

D: 60 -69: *The solution has problems in two or more major areas; skill and design development is marginal or incomplete. The project lacks imagination and/or design potential.*

C: 70 -79: *The student has solved the problem, but the solution lacks depth of understanding; Some program goals are not completely satisfied and the solution contains little promise even though most issues have been addressed.*

B: 80 -89: *The student work shows imagination and potential. Presentation and design content is good; program requirements are fulfilled but in need of more refinement or development. There are no major issues that would require a total redesign of the project.*

Throughout the semester and at the end of the semester, your area must be clean of all trash. You are responsible for cleaning your studio, desk, and locker at the end of each semester.

No power tools may be used in the design studio. No dust or odor-producing processes may be conducted in the studio. No wet casting processes may be conducted in the studio. The college shop and spray booth

Studio Policy (Required of all Studios)

All students, faculty, administration, and staff of the School of Performance, Visualization & Fine Arts at Texas A&M University are dedicated to the principle that the Design Studio is the central component of an effective education. They are equally dedicated to the belief that students and faculty must lead balanced lives and use time wisely, including time outside the design studio, to gain from all aspects of a university education and world experiences. They also believe that design is the integration of many parts, that process is as important as product, and that the act of design and of professional practice is inherently interdisciplinary, requiring active and respectful collaboration with others.

Students and faculty in every design studio will embody the fundamental values of optimism, respect, sharing, engagement, and innovation. Every design studio will therefore encourage the rigorous exploration of ideas, diverse viewpoints, and the integration of all aspects of visualization (practical, theoretical, scientific, spiritual, and artistic), by providing a safe and supportive environment for thoughtful innovation. Every design studio will increase skills in professional communication, through drawing, modeling, writing, and speaking.

Free Speech and Civil Discourse

Texas A&M recognizes that the pursuit of truth through open and robust discourse is critical to academic inquiry. However, as a community of scholars, the university has an aspirational expectation that such discourse will be conducted in accordance with Aggie Core Values. In this "marketplace of ideas," we encourage civil dialogue creating an environment that allows individuals to express their ideas and to have their ideas challenged in respectful and responsible ways. Students can learn more about Freedom of Expression and Free Speech on the University's [website](#) about the [First Amendment](#).

Artificial Intelligence Statements

There may be situations and contexts within this course where you will be asked to use A.I. tools to explore how they can be used. Outside of those circumstances, A.I. tools are not allowed to generate content (text, video, audio, images) that will end up in any work (assignments, activities, responses, etc) that is part of your evaluation in this course. Any student work submitted using A.I. tools should clearly indicate what work is the student's work and what part is generated by the A.I..

When A.I. is being used for class projects and/or assignments, students **MUST** cite which A.I. application they used, and describe how it was used in their assignment. In such cases, no more than 25% of the

student work should be generated by A.I. If any part of this is confusing or uncertain, please reach out to your instructor for a conversation before submitting your work.
